Introducing . . .

Aviator K. D. Parmentier

U. S. PATENT 445

A new COLOR in ROSES--orange-peach combination. Long pointed BUD is borne on strong, slender stems. All BUDS open perfect, *no sleepers*, 30-35 PETALS. FOLIAGE is of a *very pleasing*, fresh green color, and a great asset to the color of the rose. PRODUCTION is very good, runs in the 30's, with hardly any short stems. *Never* yet did we have to fight MILDEW on this variety, and BLACK SPOT appeared only on a few plants *once*.

IS WELL LIKED in New York Market.

Limited number of strong grafted plants available for Spring 1941 Delivery, also limited number of scions available.
